Delivery and Deployment

- Content Management Systems (CMS)
- Scripted, scalable infrastructure for today's service based architectures
- SecDevOps, continuous integration and delivery (Jenkins, SonarQube, Artifactory, Crucible, CloudFormation/Terraform)

Software Design and Development

- noNet Apps: Cache-based storage mechanism enabling your workforce to collaborate offline then sync cached data when network connectivitiy is available
- Web-based and Mobile mapping applications changing the rules on how application data is created, viewed, and shared among analyst groups

Cloud Migration & Implementation

- Lift-and-shift AWS/Azure migrations, optimizations, and cloud-native development delivered by Certified architects and developers
- Data Engineers: Spark, NiFi, Couchbase, MapReduce, Glue, Kinesis, Elasticsearch/Logstash/Kibana
- Development within C2S, DiceLab, GovCloud, Di2E
- Mono to Micro: Our design breaks down the traditional monolith into smaller microservices orchestrated through containers to enable scale on cloud infrastructures
